Prineville BLM Implements Seasonal Campfire Restrictions in La Pine Area

PRINEVILLE, Ore. — To enhance public safety and reduce the risk of wildfires, the Bureau of Land Management is prohibiting campfires on BLM-administered lands in the La Pine area from May 1 – October 31.

This decision is part of an effort to reduce human-caused wildfires that have threatened lives, property, and essential utility infrastructure that have increased over the past several seasons. During recent years, the La Pine area has experienced devastating fires, including one that damaged restoration efforts from a previous wildfire. Escaped campfires are a significant contributor to these wildfires.

Campfires, charcoal fires, and any type of open flame will be prohibited on BLM lands in the La Pine area. Properly commercially manufactured portable propane campfires, metal camp stoves used for cooking, and shielded lanterns fueled by bottled propane or liquid fuel are the only exceptions. All cooking stoves, portable propane campfires, or lanterns must meet UL/CSA safety standards.

These restrictions will apply to BLM-administered lands within the following boundaries: **South Century Drive on the north, the Fremont-Winema National Forest boundary on the south, and the Deschutes National Forest on the east and west.**

“Public use restrictions are one tool that we use to address repeated human-caused wildfires, particularly when we can identify one specific cause like escaped campfires,” said Lisa Clark, Deschutes Field Manager.

The BLM urges all visitors to respect these restrictions to help protect the natural landscape and ensure the safety of everyone who enjoys the beauty of the La Pine area. For further information, please contact the BLM Central Oregon Field Office or visit the BLM website at <https://www.blm.gov/programs/public-safety-and-fire/fire-and-aviation/regional-info/oregon-washington/fire-restrictions>.

-BLM-

The BLM manages more than 245 million acres of public land located primarily in 12 western states, including Alaska, on behalf of the American people. The BLM also administers 700 million acres of sub-surface mineral estate throughout the nation. Our mission is to sustain the health, diversity, and productivity of America’s public lands for the use and enjoyment of present and future generations.
